A friend to rely on

Hi-genie: The Homegrown Hygiene Solution for India's Post-Pandemic World

When COVID-19 hit the world, it turned everything upside down, especially when it came to maintaining cleanliness and hygiene. India's primary source of hygiene products was China, and with the pandemic, imports were halted. This left a huge gap in the market, but Mr. Saurabh Kapoor and his son Simar Kapoor decided to take matters into their own hands. They established Higenie, a brand that provides India's very own hygiene solutions, with 100% made in India automatic sanitizer and soap dispensers.

Hi-genie's dispensers are not just practical but stylish as well, perfect for any setting from homes to hospitals, clinics, malls, and offices. Their dispensers come with a 6-month warranty, ensuring long-term quality and reliability. You can use these dispensers with any type of soap or sanitizer, whether liquid, foam, or gel. They also come with large storage capacity, so you don't have to refill them frequently. And, no need to worry about changing AA batteries constantly as they are

rechargeable. Plus, with their infrared (IR) detection sensors, these dispensers can dispense within 0.2 seconds!

Higenie's products are designed to bring convenience and ease to everyday life. No more fumbling with soap dispensers or waiting for the sanitizer to dry. With Higenie's automatic dispensers, all you need to do is wave your hand, and voila! Clean hands in seconds. It's like having your very own hygiene genie at your disposal.

So why settle for imported products when you can have India's very own hygiene solution? With Higenie, you can be sure that you're getting top-quality products that are locally made and cater to your specific needs. Higenie is not just a brand, it's a partner in your daily hygiene routine.

Don't wait any longer to get your hands on your very own Higenie dispenser pack. Trust us, once you go Higenie, you'll never go back!
